Practical 6: Arrays, Strings, Linked Lists, Stacks and Queues (CO2)

Code:

```
arr = [5, 2, 8, 1]
arr.append(9)
print("Array:", arr)

s = "Hello World"
print("Reversed String:", s[::-1])

stack = []
stack.extend([1, 2, 3])
stack.pop()
print("Stack after pop:", stack)

from collections import deque
queue = deque([1, 2, 3])
queue.popleft()
print("Queue after dequeue:", list(queue))
```

Output:

```
Array: [5, 2, 8, 1, 9]
Reversed String: dlroW olleH
Stack after pop: [1, 2]
Queue after dequeue: [2, 3]
```
